Description

Material:

Stainless steel 1.4301

Version:

Green

Note:

HeliCoil®plus threaded inserts are indispensable aids for every metalworking establishment and repair workshop.

Tapped holes that have been damaged, rusted solid or drilled too big can be restored to their original size and condition within minutes.

Technically flawless and infinitely durable, resistant to corrosive influences and thermal stress. They therefore enable the repair and recovery of expensive products. The high surface finish ensures optimum yield strength and higher tensile force for high-strength screws.

HeliCoil®plus threaded inserts are also ideally suited for motion threads in all light-alloys and castings.

On request:

Other dimensions.
